Translating Microbiome Research Into Clinically & Commercially Viable Cosmetics & Therapeutics, Revolutionizing Dermatology

30 - 31 May 2018 | Boston, USA

2 FULL CONFERENCE DAYS
25+ INDUSTRY LEADING SPEAKERS
100+ BEAUTY & PHARMA EXPERTS
15+ HOURS OF NETWORKING
SKIN MICROBIOME IS SET TO REVOLUTIONIZE DERMATOLOGY

As new clinical data transpires to support the role of the skin microbiome in common conditions from acne and eczema to dandruff and skin allergies, Pharmaceutical Researchers and Cosmetic Formulators alike are turning their attention to designing and testing products that contain live bacteria, bacterial extracts or prebiotic and postbiotic ingredients to manipulate the skins microbiota.

The Skin Microbiome Congress will bring together leaders from pharmaceutical, therapeutics and cosmetics industries, to showcase:

- cutting edge research
- new therapeutic & cosmetic advances
- consumer trends & insights
- regulatory considerations

Join 100+ industry leaders to explore the different pathways to market and how to translate therapeutic research into commercially viable cosmetic products.

MEET 100+ INDUSTRY EXPERTS

- Independent Beauty Brands
- Biotech Companies
- Multinational Pharmaceutical
- Cosmetic Formulators
- Strain Manufacturers
- Multinational Beauty & Personal Care
- Ingredients Suppliers
- Sequencing Companies
- Retailers & Distributors
- Consumer Trend Analysts
- Regulatory Experts
- Packaging Manufacturers

The average consumer spends $5 a day on Skincare, using up to 515 synthetic chemicals daily to eradicate dermatological concerns.
RECOGNIZE the major consumer trends reshaping the beauty & personal care landscape, and identify the actions needed to differentiate your product lines and gain market share.

DISCUSS the important differences between regulation for cosmetics and drugs in the areas of approval, manufacturing, labelling and claims, and how these will impact your research & development process and path to market.

DISCOVER how to form effective partnerships, integrating the therapeutic and cosmetic industries and distributing risk accordingly to accelerate research and development activities.

ESTABLISH how next generation sequencing methods such as metagenomics and metabolomics can be used in determining a healthy skin microbiome and its functional interactions with the host.

NAVIGATE the challenges and opportunities in designing, formulating, manufacturing and packaging health-enhancing skin care products that contain live bacteria, bacterial extracts, or post-biotic ingredients to enhance skin microbe activity.

The relationship between the microbiome and healthy skin has been described as the new skincare frontier, with huge potential for the beauty and personal care industry. This presentation will touch upon how the microbiome is transforming the skincare market and discuss Gallinée’s journey so far, from the development and launch of their patented complex of prebiotics, probiotics, and lactic acid to their future plans to start clinical trials.

Consumers are constantly seeking out products designed to improve and maintain their overall wellbeing. As probiotic supplements are a widely-recognized solution for digestive balance and better general health, this awareness of the benefits of ‘friendly bacteria’ has extended and evolved into a probiotic narrative for skincare. This presentation will give an overview of the increasingly-popular probiotic trend within the skincare industry and future directions, focusing on the market, consumers and product launches, as well as exploring the growing number of brands that are lauding the benefits of products that keep the skin microbiota healthy and thriving.

The clinical relevance of microbial biofilms has been underestimated. These communities secrete extracellular polymeric substances that confer to the microbial communities inherent survival benefits in the biofilm phenotype. Could these microbial biofilms be our “microbiome stem cells”, survivalists, protected in gel-like biofilms which dynamically seed local human tissues? Are they a critical untapped discovery source? Could they explain unanswered questions of human health and disease in our diagnostic rubric, in particular the clinically apparent infections but negative culture results, unexplainable chronic inflammation, auto-immunity?

Dr. Monsul will share the conceptual framework behind human mucosal and epidermal biofilms, their relationships to human disease and their potential applications to human microbiome drug discovery.

Mother Dirt produces a line of products formulated to restore and maintain a keystone species of bacteria that once existed on human skin but have been removed with modern lifestyles. The temperature sensitivity and stability constraints of the products have shaped many of the distribution decisions both online and in store. This talk will cover recent learnings but also future considerations for how distribution channels might evolve to support the growth of a living topicals category.

This panel will discuss some of the challenges and opportunities ahead as we explore and develop the new science of skin microbiome armed with an abundance of enthusiasm and an economy of truth.
WHO WILL BE THERE?

Based on the success of our previous events in the Microbiome series and Beauty & Money series, you can expect to see the following companies at the new Skin Microbiome Congress 2018:
Givaudan Active Beauty offers an extensive portfolio of innovative active cosmetic ingredients designed to bring beauty to the world. Inspired by the beauty needs of consumers worldwide, Active Beauty offers award-winning products for an expanded range of benefits including anti-ageing, self-tanning, soothing, hydrating, cooling, and more. Our cutting-edge technologies draw on science and nature to create high-performing molecules and functional agents, including customised carrier systems. Part of the Fragrance Division, Active Beauty leads the market in crafting innovative products supported by our strong expertise in advanced and applied sciences. We invite you to ‘engage your senses’ and learn more about Active Beauty.

The Microbiome Invest Congress was such an amazing event for Gallinée. Not only did I meet great people like S-Biomedic and AnimalBiome, we also got in contact with very interested investors. We actually just closed a deal with Unilever Ventures, thanks to the people we met.

Marie Drago, Gallinée

The Skin Microbiome Congress is far from the typical ‘meet-and-greet’ exhibition experience. As a sponsor or exhibitor, you will be positioned as a partner of the event with a focus on the benefits of your product and brand, rather than just a name on an exhibition list.

With our extensive marketing experience and strategy, your partnership with the conference will grant you a sponsorship package that is an extension and enhancement of your current marketing and branding efforts.

Sponsorship opportunities include our exhibition hall, where you can showcase your packaging, ingredients and solutions, and content partnerships, where you can demonstrate thought leadership on our agenda. All packages include an extensive digital offering.

Interested in sponsorship?
